

The right treatment for every common household stain

### Stain type and treatment

#### **Red wine on carpet**

Blot; dish soap + hydrogen peroxide (50/50); blot dry.

#### **Grease on grout**

Baking soda paste + grout brush; citrus degreaser for heavy grease.

#### **Ink on fabric**

Isopropyl alcohol on cloth; blot from outside in.

#### **Coffee on hardwood**

Damp microfibre cloth immediately; dry at once.

#### **Pet urine on carpet**

Enzymatic cleaner (Nature's Miracle); cover with plastic; let dwell hours.

#### **Rust on tile or grout**

CLR or Bar Keepers Friend; apply, dwell, scrub.

#### **Candle wax on carpet**

Freeze with ice, crack off wax, iron over paper bag to lift residue.

#### **Mould on grout**

Baking soda + hydrogen peroxide paste; scrub; bleach for persistent mould.

#### **Golden rule: blot, never rub**

Rubbing spreads stain and pushes it deeper into fibers.
