

Interior and exterior windows, done right

Window cleaning checklist

Clean on an overcast day or in shade

Sunlight dries solution before you wipe it -- causes streaks.

Clean frames and tracks first

Prevents dragging grit across clean glass.

Window tracks: vacuum, then baking soda paste and toothbrush

Rinse and wipe dry.

Cleaning solution: few drops dish soap in warm water

Or 50/50 vinegar and distilled water.

Apply solution with sponge or microfibre

Work across the entire pane.

Squeegee top to bottom in overlapping strokes

Wipe blade after each stroke.

Buff edges with dry microfibre cloth

Where squeegee cannot reach.

Hard water deposits: CLR or citric acid solution first

Apply, let dwell, rinse, then clean glass normally.

Exterior: rinse with hose first

Removes loose debris before scrubbing.
